Information about Copyrighted Content

Some instruments administered as part of this study may contain in whole or substantially in part contents from copyrighted instruments. Reproductions of the instruments are provided as documentation for the analysis of the data associated with this collection. Restrictions on "fair use" apply to all copyrighted content. More information about the reproduction of copyrighted works by educators and librarians is available from the United States Copyright Office.

NOTICE
WARNING CONCERNING COPYRIGHT RESTRICTIONS

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted material. Under certain conditions specified in the law, libraries and archives are authorized to furnish a photocopy or other reproduction. One of these specified conditions is that the photocopy or reproduction is not to be "used for any purpose other than private study, scholarship, or research." If a user makes a request for, or later uses, a photocopy or reproduction for purposes in excess of "fair use," that user may be liable for copyright infringement.

2002 DATA SET (County & State)

FILE: ag2002co.all2.dta

Source: U.S. Department of Agriculture. 2002 Census of Agriculture. Vols. 1 & 2. Final county file on CD-ROM (AC-02-CD-1). Washington, DC: National Agricultural Statistics Service, 2004.

Variables 1-4 calculated from other variables.

Not all fields contain data.

File ag2002co.flags_all2.dta contains flag values for most of the variables (also available as ag2002co.part1_flags.dta through ag2002co.part3_flags.dta)

Codes: 0 = no flag
1 = (D): Data withheld to avoid disclosing data for individual farms.
2 = (NA): Data not available or not published.
3 = (X): Not applicable.
4 = (Z): Less than half the unit shown.

ICPSR 35206

United States Agriculture Data, 1840 - 2010

Variable Description and Frequencies

Note: Frequencies displayed for the variables are not weighted. They are purely descriptive and may not be representative of the study population. Please review any sampling or weighting information available with the study.

Summary statistics (minimum, maximum, mean, median, and standard deviation) may not be available for every variable in the codebook. Conversely, a listing of frequencies in table format may not be present for every variable in the codebook either. However, all variables in the dataset are present and display sufficient information about each variable. These decisions are made intentionally and are at the discretion of the archive producing this codebook.
